

Property Taxes

Agent Responsibilities Checklist

There are many areas where property taxes impact your clients. Review the items below to ensure that you are serving your clients' property tax needs.

- ☐ **Disclose to buyers what their property taxes will be.** This is extremely important for first-time home buyers who can often be naïve about the whole process.
- ☐ **Disclose to buyers that a sale may prompt a reassessment.** A sale can raise their taxes in the next assessment period.
- ☐ **Understand how property taxes are calculated.** Knowing how property taxes are calculated can help you understand when a new assessment may be coming that will impact your clients.
- ☐ **Investigate tax abatements and tax assessments.** Both of these items can affect the property tax owed.
- ☐ **Check the title report for property tax liens.** A lien is attached to a property when a taxpayer is delinquent in paying property taxes.
- ☐ **Be aware of any tax exemptions or deductions that may apply to your buyers.** The local tax assessor can tell you what exemptions or deductions are available in your municipality.
