

Radon

Radon is commonly found in soil and well water.

Radon can enter your home through...

Water

**Soil tracked in
from outside**

Floor drains

Sump pumps

Cracks in concrete

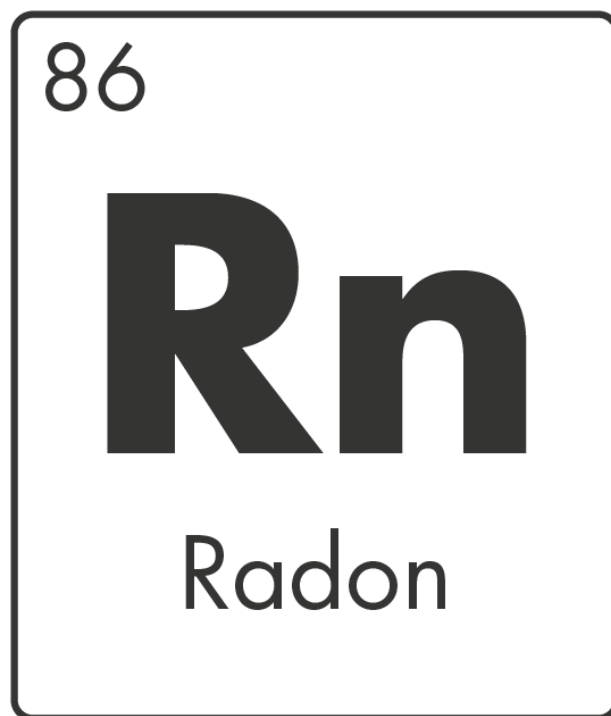

Porous walls

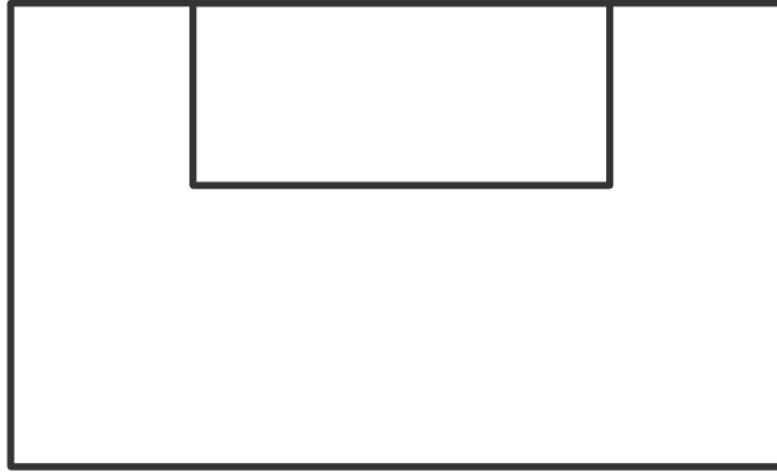

How can you find out
the level of radon in
your home?

Test for it!

**Buy a test kit or
hire a professional**

**Send the test canister
to an approved lab**

**Lab performs test
and reports findings**
