```

### **Market Value**

The price a property should sell for under normal, competitive market conditions.

### **Assessed Value**

Value assigned by a tax assessor to calculate property taxes.

### **Highest and Best Use**

The most profitable, legally permissible, and feasible use of a property.

### **Plottage**

Increase in value created by combining adjacent parcels into one larger tract.

### **Environmental Forces**

Natural and physical surroundings that affect property value (e.g., climate, terrain).

### **Social Forces**

Demographic trends and neighborhood characteristics influencing value.

### **Political Forces**

Government laws, zoning, and regulations affecting property value.

### **Economic Forces**

Market conditions, employment levels, and general economy impacting value.

### **Sales Comparison Approach**

Appraisal method comparing a property to recently sold similar properties.

### **Cost Approach**

Appraisal method based on what it would cost to replace or reproduce the structure.

### **Income Approach**

Appraisal method estimating value based on a property's income potential.

### **Comparative Market Analysis (CMA)**

A value estimate prepared by an agent using comparable sales; not an appraisal.

### **Adjustments**

Changes made to comparable properties (not the subject) to account for differences in features, condition, or amenities.

### **Cap Rate**

The rate of return an investor expects from an income-producing property.

**Gross Rent Multiplier (GRM)**

Sales price divided by monthly gross rent, used to estimate value quickly.

**Gross Income Multiplier (GIM)**

Sales price divided by annual gross income.

**Evaluation**

Study to determine land use or marketability; not an appraisal.

**Valuation**

Process of forming an opinion of value for a property.

**Appraisal**

Unbiased estimate of value performed by a licensed appraiser as of a specific date.

**Insured Value**

The amount an insurance company will cover, usually based on the replacement cost of the structure excluding land.

**Mortgage Value**

The value a lender assigns to the property for loan purposes, often tied to appraised value or loan risk.

**Investment Value**

The value of a property to a particular investor based on that investor's income goals, tax situation, and return expectations.
